Author Index to Volume 115 (2000)

Abd-el-Malek, M.B. and **S.M.A. El-Mansi,** Group theoretic methods applied to Burgers' equation 1– 12
Aguirre Téllez, M., The distributional product of Dirac's delta in a hypercone 13– 21
Amini, S. and **A. Profit,** Analysis of the truncation errors in the fast multipole method for scattering problems 23– 33
Angelini, C. and **D. De Canditiis,** Fourier frequency adaptive regularization for smoothing data 35– 50
Anwar, M.N., see **Sallam, S.** 495–502
Azizi, M., E.M. Daoudi, R. El Hani and **A. Lakhouaja,** Parallel electromagnetic modelling for the nonlinear electrotechnic systems 51– 61

Barral, P. and **P. Quintela,** Numerical analysis of a viscoplastic problem with contact condition taking place in an aluminium casting 63– 86
Bavinck, H., A note on the Koekoeks' differential equation for generalized Jacobi polynomials 87– 92
Cabral-Rosetti, L.G. and **M.A. Sanchis-Lozano,** Generalized hypergeometric functions and the evaluation of scalar one-loop integrals in Feynman diagrams 93– 99
Callebaut, D.K., see **Khater, A.H.** 309–329
Calvetti, D., L. Reichel, F. Sgallari and **G. Spaletta,** A regularizing Lanczos iteration method for underdetermined linear systems 101–120
Calvo, M., M.P. Laburta, J.I. Montijano and **L. Rández,** On the numerical integration of orthogonal flows with Runge–Kutta methods 121–135
Carmo Coimbra, M., C. Sereno and **A. Rodrigues,** Modelling multicomponent adsorption process by a moving finite element method 169–179

Daoudi, E.M., see **Azizi, M.** 51– 61
De Canditiis, D., see **Angelini, C.** 35– 50
de Frutos, J. and **J. Novo,** An enhanced pseudospectral Chebyshev method for dissipative partial differential equations 137–150
De Schepper, H. and **R. Van Keer,** On the numerical approximation of some types of nonstandard second-order eigenvalue problems for vector valued functions 151–167

El Hani, R., see **Azizi, M.** 51– 61
El-Mansi, S.M.A., see **Abd-el-Malek, M.B.** 1– 12
Ezquerro, J.A., M.A. Hernández and **M.A. Salanova,** A discretization scheme for some conservative problems 181–192
Ezquerro, J.A., see **Hernández, M.A.** 245–254

Ford, N.J., see **Wulf, V.** 601–616

Galperin, E.A., E.J. Kansa, A. Makroglou and **S.A. Nelson,** Variable transformations in the numerical solution of second kind Volterra integral equations with continuous and weakly singular kernels; extensions to Fredholm integral equations 193–211
Gao, Y.-m., see **Kohno, T.** 349–355
Gheri, G. and **P. Marzulli,** Parallel shooting with error estimate for increasing the accuracy 213–227

Hamina, M., An approximation method for the hypersingular heat operator equation 229–243
Hernández, M.A., see **Ezquerro, J.A.** 181–192
Hernández, M.A., M.J. Rubio and **J.A. Ezquerro,** Secant-like methods for solving nonlinear integral equations of the Hammerstein type 245–254
Huard, A. and **V. Robin,** Continuity of approximation by least-squares multivariate Padé approximants 255–268
Hureau, J., see **Weber, R.** 577–591

Ibrahim, R.S., see **Khater, A.H.** 309–329

Jeon, Y., Scalar boundary integral equation formulas for the biharmonic equation — numerical experiments 269–282
Junghanns, P. and **K. Müller,** A collocation method for nonlinear Cauchy singular integral equations 283–300

Kananthai, A., On the convolution equation related to the N-dimensional ultra-hyperbolic operator 301–308
Kansa, E.J., see **Galperin, E.A.** 193–211
Khater, A.H., A.B. Shamardan, D.K. Callebaut and **R.S. Ibrahim,** Chebyshev spectral collocation methods for nonlinear isothermal magnetostatic atmospheres 309–329
